

Medivision[®]

Sales tools for your dental team

An informed patient is more likely to accept your proposals!

Increase case acceptance by educating patients on complex treatment options through the use of animated videos, and simplify complex procedures with easy-to-understand videos.

Animation and leaflets are shown at the chairside and both can be emailed to the patient with a couple of clicks. Over 200 animated topics together with still photographs and patient information leaflets to take away!

Videos get installed on a computer of your choice to play for the patient (pricing is per install, monthly or one time).

Treatment options explained

Explaining the options open to the patient is a fundamental part of informed consent. Medivision will increase your case acceptance and the profitability of your practice.

Language barriers

Using friendly animations, Medivision will quickly overcome language barriers and also help eliminate the jargon of dentistry. Animation and leaflets are available in English, Spanish, French, German and Italian.

Education

Medivision can be used to educate patients about oral healthcare, how and why preventative dentistry is important to them. Motivating patients to take care of themselves and increasing your sundry sales.
