

Ambient Temperature Amnion Fluid

Liquid allograft derived from human amniotic fluid.

Ambient fluid at $25^{\circ}\pm 7^{\circ}\text{C}$ / $77^{\circ}\pm 13^{\circ}\text{F}$

Rich in natural growth factors and cytokines associated with tissue repair, replacement, and regeneration.

One year shelf life; provided as a sterile, ready to use, flowable graft with no thawing or preparation required

Maintained as a fluid throughout its entire life cycle.

We do not lyophilize or add Micronized membrane.

- **Terminally** sterilized.

*No claim is made on live cell count post terminal sterilization
