

Intended Uses

Plastic Surgery • Trauma • Burns • Ulcerations •
Cancerous Skin Removal • Scaffolding

Example Procedures

Mastectomies • C-Sections • Non-Healing Diabetic
Ulcers • 3rd Degree Burns

Product Description

MyOwn Skin™ is a unique biological technology, that is a painless, non-surgical procedure which leverages a small sample of a patient's own skin (1x1 cm), along with the patient's blood, to produce as much as three 100 cm² of a patient's own skin in seven days. The minimum order size for this product will be one 5x5 cm² sheet. MyOwn Skin™ is processed under FDA Regulation 361, which allows for a minimally manipulated autologous product.

Product Description

Fluid Flow™ liquid allograft is derived from the amniotic liquid within the placenta. It is rich in the growth factors and cytokines known to reduce inflammation, add an extra layer of microbial protection, and promote angiogenesis.

Product Classification

MyOwn Skin™ is classified as a Skin Graft.

Product Coding, Billing and Reimbursement

As a Skin Graft, existing CPT-Codes can be used for reimbursement (see our CPT-Coding Guide) along with the Q-code for MyOwn Skin™, **Q4226**.

Sizes

\$400 per squared centimeter with size options at 5x5 cm² (25 cm) and 10x10 cm² (100cm).

Product Benefits
