

Product Description

BioLab Fluid GF™ is an amniotic liquid allograft derived from the amniotic fluid within the amniotic sac used to protect, lubricate and cushion. BioLab Fluid GF™ is solely composed of amniotic fluid and does not contain any lyophilized or micronized membrane.

Donor/Tissue Screening

The donor has been assessed for high risk behavior and relevant diseases. The donated tissue has been deemed acceptable for transplant in accordance with strict industry standards. All BioLab Sciences amniotic liquid allografts have been tested for potentially infectious diseases and terminally sterilized to ensure the safety of each liquid allograft.

Fluid GF™ amniotic liquid allograft

BioLab Fluid GF™ Product Benefits

Ready to use

BioLab Fluid GF™ provided in a vial as a ready to use flowable graft, with no thawing or prep required.

Room Temperature

BioLab Fluid GF™ is stored at room temperature (50-86°F/10-30°C) until ready for use. Product has a 1 year shelf-life.
